What do you look for in a dining chair?

I like a dining chair that tucks almost completely under the table. That way, you can see the table arrangement and the candles. Nothing needs to be up at 45" high.

Besides white, what paint colour looks good in any room?

Lavender! It's calming for a bedroom when paired with creamy bedding, or for a living room, enliven it with a patterned red sofa. Use it in kitchens and bathrooms with white cabinets and tiles, or for a guest room, add yellow bedding and drapery to complement lavender walls.
